House Bill 3440: Prescription Drug Monitoring Program Implementation

1. Establish a clinical review subcommittee of the PDMP Advisory Commission to review PDMP data and recommend training or education for providers.
2. Include dispensed Naloxone and patient phone number in the PDMP.
3. Establish Interstate data sharing with select states.
4. Provide quarterly overdose report via data dashboard and an annual report to legislature.

House Bill 3440: Establish a Clinical Review Subcommittee

- Goal: Develop criteria to determine which prescribers may benefit from additional opioid prescribing.
- Details:
 - Subcommittee made up of experienced prescribers
 - Subcommittee review de-identified data provided by PDMP staff
 - Determine criteria for receiving additional training
 - Provide prescriber names to respective boards to provide training
- Limitations:
 - Lack of diagnosis codes
 - Lack of specialties

House Bill 3440: New PDMP Field and Naloxone

- New Field – Phone Number
 - Improved patient matching
- Identified Naloxone
 - More data for targeted interventions
 - Provider knowledge benefits

House Bill 3440: Interstate Data Sharing

- OR PDMP partnering with NABP to utilize PMPi data sharing hub.
- Most data sharing states partnered with NAMP.
- OR PDMP will prioritize connections with neighboring states
